

JEANE RAMOS

msjeanneramos@gmail.com | Denver, CO | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software Engineer with production React/TypeScript experience and full-stack range across Node.js and PostgreSQL. Currently shipping and deploying independent full-stack applications with automated testing and modern tooling.

SKILLS

Frontend: React, React Router, Next.js, TypeScript, JavaScript (ES6+), Redux, Vite, Tailwind CSS, SASS/CSS, HTML5, AngularJS, Bootstrap, Foundation, Material UI, Responsive & Accessible UI, Reusable Component Design, Figma (building components from designs)

Backend: Node.js, Express, REST APIs, PostgreSQL (transactions, defensive query design, caching strategy), MongoDB, MySQL, Ruby on Rails, PHP, C#, Stripe, Zod, Docker, Railway, Linux/Apache

Testing & Tooling: Vitest, React Testing Library, Jest, GitHub Actions (CI/CD), Git/GitHub, ESLint, Webpack/Babel, Vim, Bash, Grafana, Claude Code, GitHub Copilot, Jira/Pivotal

Design: GIMP, Photoshop, Illustrator

For Fun: Science fiction/fantasy literature, anime, PC games, traditional illustration

EXPERIENCE

Software Engineer at Independent

June 2024 – Present | Remote

Self directed engineering work: designing, building, and deploying full-stack production applications independently, end to end.

- Returned to professional development after a multi year gap by bringing myself up to speed with a modern stack (Next.js, TypeScript, Tailwind, Vite) through daily, deliberate iteration, rebuilding a production ready skill set and sustaining continuous, shipped work ever since.
- Built and deployed YTCatchup, a full-stack YouTube subscription app (React, Express, PostgreSQL, Google APIs) with custom auth, a curated Lists feature, a round-robin feed-ordering algorithm, a caching layer to reduce external API load, and a full automated test suite, now live in production at ytcatchup.com with a public GitHub repository.
- Designed and built an admin panel with live YouTube API quota tracking and an invite based access system, enabling controlled scaling past Google's OAuth user cap. Built a Grafana dashboard on top of the underlying usage data, with custom SQL queries, multiple visualization types, and threshold based alerting. Navigated Google's OAuth app verification process end to end, including domain verification, scope justification, and branding review.
- Designed and deployed a personal engineering site and technical blog to build a public, credible engineering presence beyond a single project, live at jeane.dev showcasing ongoing work.
- Built and published a Steam Workshop mod in C# using Harmony runtime patching, reaching 170+ active subscribers.

Tech Stack: React, TypeScript, Node.js, Express, PostgreSQL, Vite, Tailwind, Vitest, Zod, Railway, C#, Git

Frontend Developer at Floify

Feb 2021 – May 2021 | Boulder, CO

Small team. Worked on lender/borrower facing pages for uploading mortgage documents, including early work modernizing pages not yet built in React.

- Built and maintained frontend UI features using React, Redux, and TypeScript, and began work modernizing legacy lender/borrower facing document upload pages onto the team's React stack, collaborating cross functionally within a small, fast moving team.

Tech Stack: React, Redux, TypeScript, JavaScript, HTML, CSS, AJAX

Frontend Engineer at CBS Interactive

Nov 2018 – Aug 2020 | Miami-Fort Lauderdale Area

Small, dedicated Fantasy Sports team running a full sprint process, with support and resources from the larger CBS Sports engineering organization.

- Led the port of the Fantasy Sports app frontend from a legacy Perl/jQuery stack that was becoming difficult to maintain to React/Node, improving maintainability and performance for a high traffic consumer facing product.
- Shipped UI components with WCAG compliant contrast ratios and screen reader support as a standard part of the development workflow.

- Reviewed pull requests daily and mentored junior developers on React patterns and best practices, and wrote and maintained automated tests as part of the standard workflow, supporting consistent code quality and team growth.
- Diagnosed and resolved live production issues under pressure on high traffic pages, keeping a consumer facing product running smoothly.

Tech Stack: React, TypeScript, Node.js, JavaScript, HTML, CSS, AJAX

JavaScript Developer at Maximus Live / Union Square Media

Jun 2018 – Oct 2018 | Miami Beach, FL

Built components for client facing tools that automated and optimized digital advertising campaigns, including integrations with Gemini, Taboola, and Outbrain ad networks.

- Designed and built frontend components for client facing tools that automated digital advertising campaign optimization, integrating with major ad networks (Gemini, Taboola, Outbrain), so clients no longer needed to manage campaigns manually; also refactored legacy sections and trained new frontend developers.
- Fixed bugs across client facing sites, including live site outages, resolving issues quickly under pressure.

Tech Stack: React, Redux, JavaScript, HTML, CSS, AJAX

Full-Stack Developer at Independent

2010 – 2019 | Remote

Independent, self directed web development and online ventures, monetized independently.

- Built and self hosted multiple independent web projects end to end (Node.js, React, Ruby on Rails, WordPress/WooCommerce), managing Linux servers for deployment while continuously picking up new languages and frameworks along the way.
- Built and ran ImSoCode, a PHP tutorial and community blog self hosted on Apache and MySQL, teaching the LAMP stack to a real, engaged readership through original tutorials and ongoing community management.
- Built and ran Cyberica Media, a content and social media marketing service selling custom articles, social post packages, and SEO services, with Stripe integrated payments and repeat customers.

Tech Stack: Node.js, React, Ruby on Rails, PHP, Stripe, WordPress, WooCommerce, MongoDB, MySQL, Linux/Apache

COMMUNITY LEADERSHIP

Founder & Organizer at ReactJS Fort Lauderdale (Meetup.com)

May 2019 – Nov 2020 | Fort Lauderdale, FL

- Founded and ran a local React meetup where none existed before, merged the group into the larger FloridaJS meetup in Nov 2020 and co-organized it with two other owners, and planned and hosted a virtual community event on January 26, 2021 featuring Dan Abramov (React core team) as guest speaker.

EDUCATION

Talented Unlimited High School, New York, NY. Focus: Instrumental Music.
